Ciffo

La Bürsch è il nuovo progetto di Alessandro Ciffo che consiste in un paesaggio domestico, composto da elementi monolitici di marmi alieni, incastonati in grandi cornici di granito. Il tutto, ovviamente, realizzato in silicone rigenerato.

La Bürsch è anche il modo antico di chiamare la casa nella Valle del Cervo di Biella, luogo di nascita e vita di Ciffo, un territorio che lega parte della sua storia e del suo sviluppo, proprio all'esistenza di un granito chiamato Sienite.

Ciffo come solito fare, attraverso la manipolazione del silicone, suo materiale prediletto, e attraverso un processo di rigenerazione degli scarti del suo laboratorio, inganna la vista e riproduce fedelmente la sienite, e come fecero prima di lui gli abitanti della valle, lo porta a Milano; nel passato venne usato per fare i marciapiedi della grande città, oggi reinterpretato in chiave contemporanea per arredare le case più prestigiose della metropoli più avanguardista del mondo nell'ambito dell'arredamento.

La Bürsch is Alessandro Ciffo's new project, which consists of a domestic landscape composed of monolithic elements of alien marble set in large granite frames. All, of course, made of regenerated silicone.

La Bürsch is also the ancient way of calling a house in the Deer Valley of Biella, Ciffo's birthplace and place of life, an area that links part of its history and development to the existence of a granite called Sienite.

Ciffo, as he is wont to do, through the manipulation of silicone, his favourite material, and through a process of regeneration of the scraps from his workshop, tricks the eye and faithfully reproduces syenite, and as the inhabitants of the valley did before him, he takes it to Milan; in the past it was used to make the pavements of the big city, today it is reinterpreted in a contemporary key to furnish the most prestigious homes in the world's most avant-garde metropolis in the field of furnishing.

Azzurro - Cod. Ib0110

Marrone - Cod. Ib0111

Verde / Arancio - Cod. Ib01112

Verde - Cod. Ib0113

Ciffo

Alessandro Ciffo dal 1997 produce e distribuisce nel mondo, attraverso i canali di prestigiose gallerie milanesi, collezioni di opere considerate crocevia tra arte e design.

Autoformazione e autoproduzione sono le parole chiave del suo percorso, caratterizzato dalla sperimentazione a tutto tondo delle caratteristiche tecniche ed emozionali del silicone, suo unico medium, capace di esprimere un linguaggio contemporaneo, originale e in continua evoluzione.

Nel 1998 presenta la prima collezione di vasi interamente realizzati in silicone dal 1999 al 2022 realizza piu' di 30 collezioni di vasi e accessori per la casa, alternando limited edition a pezzi unici; parallelamente avvia la ricerca bidimensionale, proposta come "silicone painting" e crea i presupposti per nuove soluzioni cromatiche e grafiche applicabili al settore dell'arredamento

Nella sua ricerca è importante il dialogo con le discipline e i materiali che hanno sviluppato le grandi maestranze italiane, dalla pietra e il marmo, alle ceramiche e il vetro, da Carrara a Faenza da Vietri a Murano.

Gli ultimi anni sono caratterizzati dalla nuova collaborazione con la galleria milanese Rossana Orlandi con la quale intraprende la sfida della sostenibilita' e della responsabilita' dell'arte, introducendo un ciclo di riutilizzo totale degli scarti di produzione del proprio atelier.

Since 1997, Alessandro Ciffo has been producing and distributing worldwide, through the channels of prestigious Milanese galleries, collections of works considered to be at the crossroads between art and design.

Self-education and self-production are the keywords of his path, characterised by allround experimentation with the technical and emotional characteristics of silicone, his only medium, capable of expressing a contemporary, original and constantly evolving language.

In 1998 he presented the first collection of vases made entirely of silicone from 1999 to 2022, he realised more than 30 collections of vases and home accessories, alternating limited editions with unique pieces; at the same time he started two-dimensional research, proposed as "silicone painting" and created the premises for new chromatic and graphic solutions applicable to the furnishing sector

Important in his research is the dialogue with the disciplines and materials developed by the great Italian craftsmen, from stone and marble to ceramics and glass, from Carrara to Faenza from Vietri to Murano.

The last few years are characterised by his new collaboration with the Milanese gallery Rossana Orlandi, with whom he takes up the challenge of sustainability and responsibility in art, introducing a cycle of total reuse of production waste from his atelier.
